Autodesk Autodesk is an American multinational software company that develops three-dimensional (3D) modeling software, animation

---

software, games software, and design software, including AutoCAD. History The history of Autodesk dates back to 1972, when Gary Starkman started a small software company in a two-car garage in a house at the campus of the University of Utah in Salt Lake City, Utah. His company was called Acorn Systems. The first version of the Acorn Systems software was called Acorn 2.0. In 1974, Autodesk was formed with the

---

merger of Acorn Systems and Unisys. Autodesk developed its first product, Vectorworks, in 1979. By the end of 1980, the company had shipped over 25,000 copies of Vectorworks to over 600 customers in the United States, the United Kingdom, and Germany. In 1982, Autodesk developed and released AutoCAD (Automatic Computer-Aided Design). In 1985, Autodesk introduced its "2B/D" licensing model and

---

introduced Dimension, a feature that combined Vectorworks and AutoCAD. In 1989, AutoCAD was chosen as one of the "10 Coolest Products" by users of the British magazine Computer Shopper. In 1990, Autodesk launched 3D Studio Max, a non-linear editing tool for animation and 3D graphics. In 1994, the company unveiled an innovative new paradigm for the construction of a building by connecting the CAD drawings

---

of an architect to a site-specific construction model using interlocked parametric building blocks. In 1996, Autodesk introduced Inventor, a graphical user interface (GUI) for rendering architectural designs and surface models. In 1998, Autodesk acquired California-based Developer Products Inc., and shifted its software engineering center from Utah to California. In 2000, Autodesk acquired Capstone Design

---

Software. In 2002, Autodesk acquired R|Shapeworks, a 3D graphics software developer. In 2004, Autodesk launched 3ds Max, a powerful 3D modeling and animation software. In 2005, Autodesk announced the acquisition of UK-based Technical-Design Software. In 2006, Autodesk acquired Italy-based creator of SimPro, Autodesk and launched the Autodesk Solution for FEA, product for large engineering

---

analysis. In 2009, Autodesk acquired German manufacturer of building information modeling, Arup.
